BEEZMART

BEEZ Challenge

Alessandro, Celeste, Francesco, Martina

BASIC ELEMENTS

User login

Homepage with token balance and transactions history

Transferring tokens in an **easy** and **quick** way

Uploading new assets and claiming their ownership

IMPLEMENTATION OF AI

BY uploading an object an **unique** digital asset is created

Use of **gpt-4 with Vision api to classify object**s into categories

This use of AI **prevents** the user from **inaccurate classification**

USE OF NFC

Creating a more tangible association between physical and digital objects.

By using **NFC sticker** on objects, the corresponding digital asset pops up in the app.
