

Gruber challenge:

# LogiTrack

Shoot the truck

# The Problem

- High fragmentation of logistic companies.
- Highly competitive and turbulent market.
- The relentless cost per kilometer.

What do you know about your competitor routes?

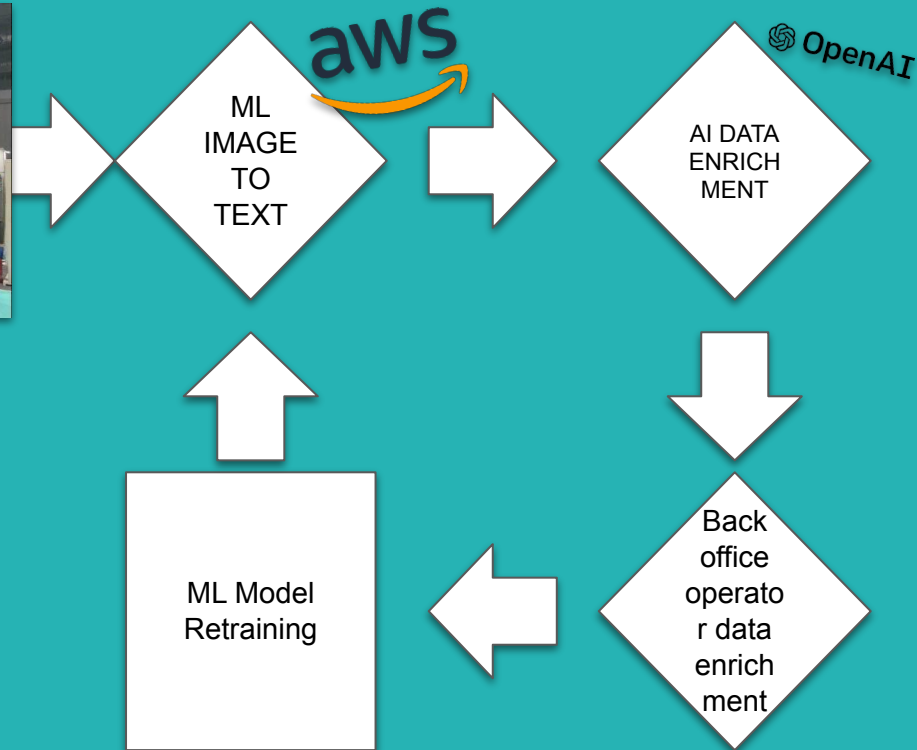

# LogiTrack

Automagic truck recognition

Tracking your competitors all over the globe is at the distance of a single touch.

# Tech Stack

## Presentation layer:

- HTML5 web application

## Backend layer:

- Mysql database
- NodeJS application

## Data enrichment layer:

The real challenge presented by Gruber Logistics is

HOW DO WE

**ENGAGE**

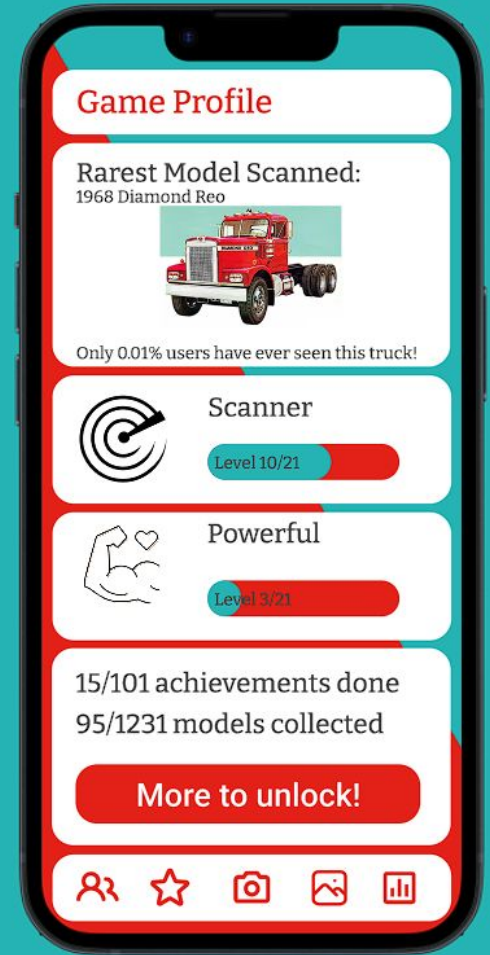

OUR DRIVERS?

# Gamifying Data Collection

Drivers are the heartbeat of logistics, not just data *scrapers*.

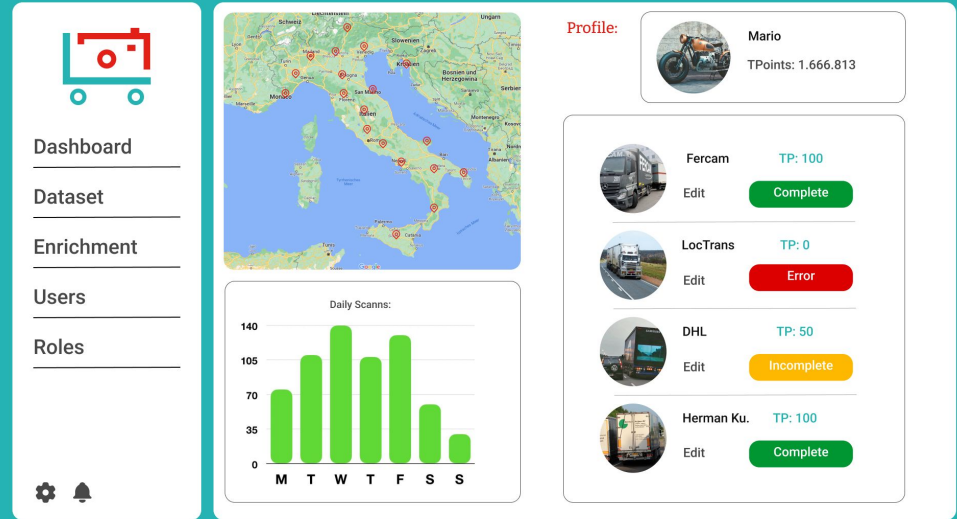

Our project's mission is to outline a **win-win** feature set that promotes the widest possible adoption of the app by end users.

To achieve this goal we must **reward** drivers with what they miss most due to the peculiarities of their work: quality of life

# Business feature set

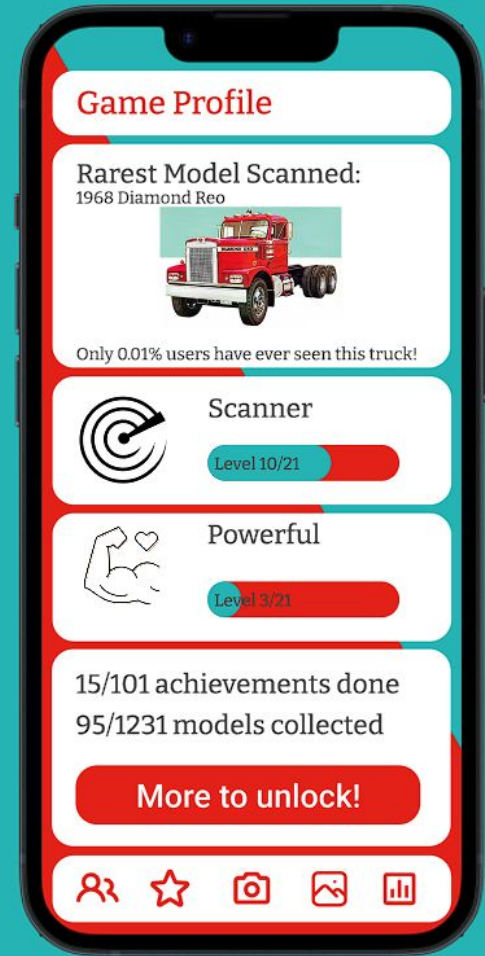

- Competitor tracking across the globe
  - Geotagging
  - License plate recognition
  - Competitor data enrichment
    - Legal entity
    - Addresses
    - Phone numbers
    - Contact email addresses
- Backoffice web application
  - Data quality
  - Data enrichment
  - Data analysis
    - also via maps

# Driver point system

- Every **shoot** gets points
- Daily and weekly special **challenges**
- Photo quality
- Manual data enrichment
- **Rare** shoots
  - First-ever truck model
  - First ever company
  - Known company in a new region or state
  - ...
- Built-in **community**

# Driver rewards

Corporate welfare, 100% tax deduction for companies, 100% life quality for drivers

A strategic lever for Companies:

- **INCREASE** worker well-being
- **ATTRACT** new drivers and reduce turnover
- **INCREASE** productivity
- **CONTAIN** labor costs

Real value for drivers:

- **PROMOTES** work-life balance
- **INCREASES** purchasing power
- **STRENGTHENS** the relationship with the company
- **IMPROVES** the quality of life
