# The project

## How can we turn AI usage data into better management decisions?

### KON Board

- Monitor AI adoption, usage and costs.
- Compare organizations and explore payment scenarios.
- Understand how tools and resources connect.

### KON Dash

- Discover and reuse existing tools.
- Create agents, apps and automations.
- Manage tools in one workspace.

# Technical approach

## HTML CSS JavaScript

Organization IDs connect financial and usage records.
Tool references reveal configured resources.

### Financial scenario engine

Editable monthly costs and payment responsibilities.
