Catch Solve Challenge

Could you test my website?

But... the tester does not speak your (IT) language

Testing has never been easier!

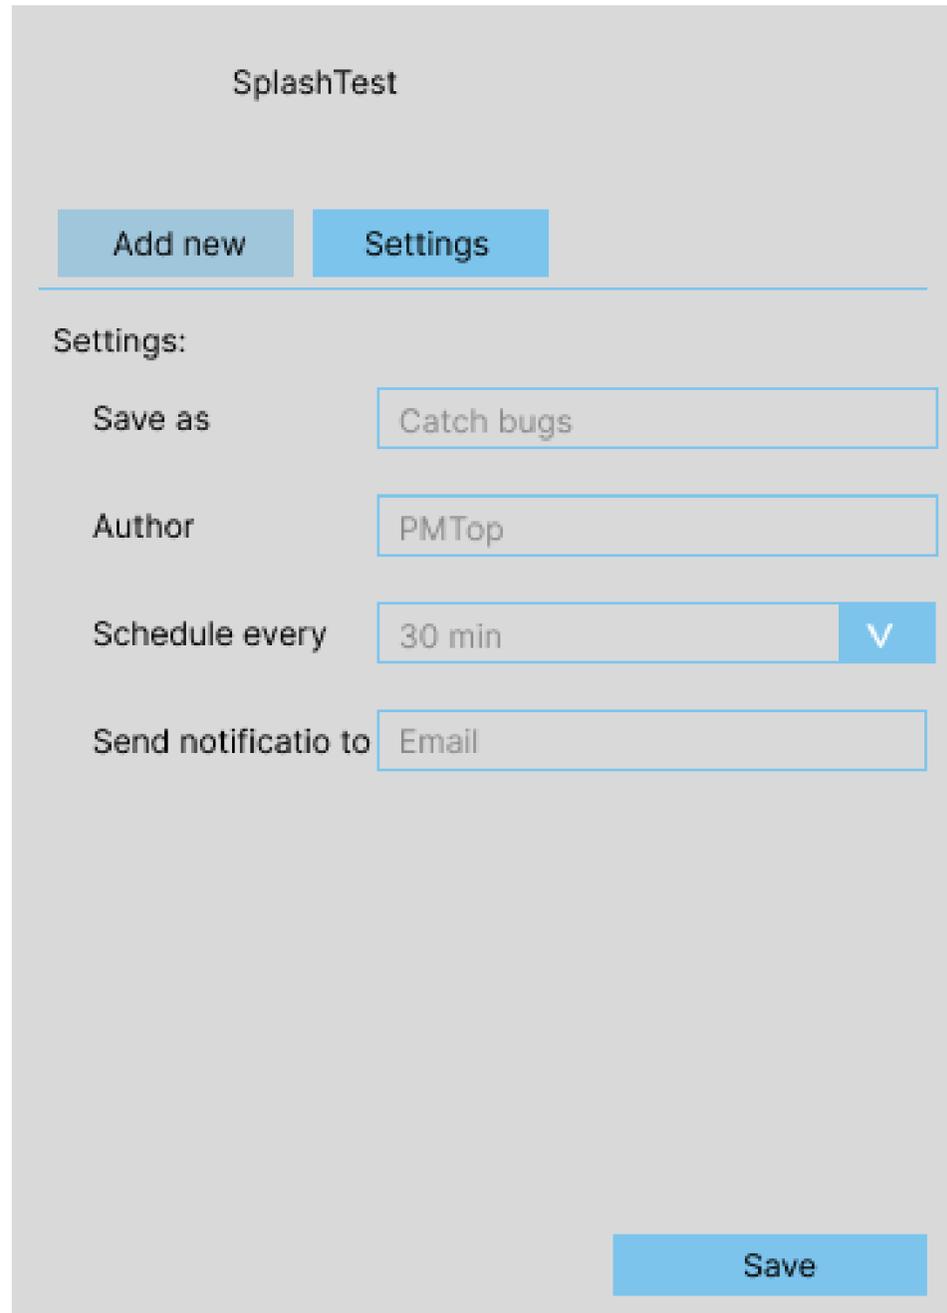

Just a few clicks to create, customise, run and save your tests!

Once you set them up, select the recurrence and the system will directly update you via email in case of any bugs.

Are you ready to Splash Test?

How does it work?

Start to fill the settings for your test and click on "Add new".

The image shows a screenshot of a web interface for configuring a test named "SplashTest". At the top, the title "SplashTest" is centered. Below it are two buttons: "Add new" and "Settings", with "Settings" being the active tab. A horizontal line separates the header from the settings section. The settings are listed as follows:

- Save as:** Catch bugs
- Author:** PMTop
- Schedule every:** 30 min (with a dropdown arrow)
- Send notificatio to:** Email

A "Save" button is located at the bottom right of the form.

How does it work?

Create your test, look at the test flow and save!
